

BHAVY GARG

New Delhi, India | bhavygarg7636@gmail.com | +91 8810517347 | LinkedIn | GitHub

OBJECTIVE

Computer Science undergraduate specializing in AI & ML with experience in machine learning, full-stack development, and data-driven systems. Strong foundation in algorithms, problem-solving, and software engineering with interest in building scalable applications and applying predictive modeling to real-world problems.

EDUCATION

Vellore Institute of Technology, Chennai Expected 2028
B.Tech in Computer Science and Engineering (AI & ML) | CGPA: 9.15 / 10.0
National Victor Public School, New Delhi 2024
CBSE Class XII — 85.8% — CBSE Class X (2022) — 92%

TECHNICAL SKILLS

Programming: Python, Java, C++, SQL, JavaScript, TypeScript
Core CS: Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks
Web & Backend: React.js, Node.js, Express.js, Flask, REST APIs, HTML, CSS
Machine Learning: NumPy, Pandas, Scikit-learn, NLP, Feature Engineering, Matplotlib, Seaborn
Databases: MySQL, SQLite
Tools: Git, GitHub, Power BI, Streamlit, VS Code, Jupyter Notebook, Google Colab

EXPERIENCE

Machine Learning Intern — Cognifyz Technologies June 2026 – July 2026

- Built scalable data preprocessing pipelines using Pandas and Scikit-learn for datasets exceeding 10,000 records, improving data quality and model readiness.
- Developed and evaluated regression and classification models using feature engineering and model evaluation techniques.

PROJECTS

Fake News Detection using Machine Learning | *Python, Scikit-learn, Pandas, NLP* GitHub

- Developed an NLP-based fake news detection model using TF-IDF and text preprocessing, achieving 93% classification accuracy.
- Trained and evaluated Logistic Regression and Naive Bayes models using accuracy, precision, recall, and F1-score.

FoodShare — Food Waste Management System | *Node.js, Express, MySQL, JavaScript* GitHub

- Built a full-stack platform connecting food donors, NGOs, volunteers, and administrators to streamline food donation and redistribution.
- Implemented JWT authentication, role-based access control, REST APIs, and SQL-based analytics dashboards.

Bluestock – Mutual Fund Analytics Platform | *Python, SQL, SQLite, Pandas, ETL, Power BI, Streamlit* GitHub

- Engineered an end-to-end ETL and analytics pipeline to ingest, clean, validate, and store mutual fund data in SQLite using modular Python scripts.
- Performed portfolio risk analytics using Sharpe Ratio, Alpha, Beta, VaR, CVaR, Monte Carlo simulation, and Markowitz Efficient Frontier optimization.
- Designed a 4-page interactive Power BI dashboard with KPI cards, risk-return analysis, investor insights, SIP trends, and interactive filtering.

LEADERSHIP

R&D Member — Centre for Social Entrepreneurship and Development, VIT Chennai Jul 2025 – Present

- Coordinated club events and represented the organization during the VIT Club Expo.

Management Member — Nexus VIT Chennai Oct 2025 – Present

- Coordinated a hackathon with 250+ teams and supported a technology forum with 1000+ participants.

CERTIFICATIONS

- Google AI Essentials** — Coursera (Google): Generative AI, Prompt Engineering, Responsible AI
- Google Prompting Essentials** — Coursera (Google): LLM Prompting and AI Productivity
- Elements of AI** — University of Helsinki & MinnaLearn: AI Fundamentals
